

34 to go....!

🎉 Happy New Year! 🎉

2019 was an incredible year for REVIVED, with 163 participants recruited from 29 different sites, by far our best year to date.

It is a very exciting time in REVIVED as we enter the final few months of recruitment. We now have only 34 participants left to recruit. It is important to work up those last few potential patients as soon as possible to ensure they can enter the study before we reach our target.

We will keep you all posted as we countdown to participant no. 700.

Our recruitment rate over 2019 was 13.5 participants per month. If we continue recruiting at this rate, we could reach our target in March.

And here's to you

A big thank you to everyone who has had a part to play in REVIVED. From identifying potential patients, to booking in extra echos, angiograms or CMRs, to following up participants over the past 6.5 years, every person involved has helped get REVIVED where it is today.

Quarter 4 (2019) Recruitment

We had yet another amazing quarter of recruitment to finish 2019 in style. Well done to the teams at the following 17 sites who recruited 43 participants:

Oliver, Bhavik, Dan, Mervyn, Roshan
Barts Heart Centre
4 participants

Dwayne, Donna, Judith
Pinderfields Hospital
2 participants

Kalpa, Ibrahim, Yasmin, Cristina, Rissa, Laura
Bristol Heart Institute
2 participants

Peter, Sarah K, Sarah O, Anja
Royal Bournemouth Hospital
1 participant

Tim, Fraser, Jenny, Mel, Javed, Simone
Dorset County Hospital
1 participant

Patricia, Lana, Mark
Royal Victoria Hospital
4 participants

Richard, Adam, Vera, Louise, Michael
Freeman Hospital
2 participants

Melli, Sam
Southampton General Hospital
2 participants

Tony, Manju, Emma, Iain
Glenfield Hospital
1 participant

James, Rupert, Giovanna, Claudia, Natalia, Vennessa, Suganthini
St George's Hospital
3 participants

Marion, Marie, Mark, Stuart, Betty
Golden Jubilee National Hospital
8 participants

Amy, Divaka, Matt
St Thomas' Hospital
5 participants

Jon, Cat, Ajay, George
King's College Hospital
1 participant

Michelle, John, Jon, Kathryn
Leeds General Infirmary
3 participants

Nick, Pauline
Sunderland Hospital
2 participants

Nichola, Prab, Rod
Liverpool Heart and Chest Hospital
1 participant

Sarra, Bindhu, Tigani
Wythenshawe Hospital
1 participant

Screensaver poster

We have created a new poster that can be used as a screensaver for your department, site or trust. It includes short and simple information about the trial, how many participants your site has recruited so far, and who to contact about potential eligible patients.

Email revived@LSHTM.ac.uk if you would like a copy or need some help personalising it.

Co-enrolment

REVIVED participants (or potential ones) may be eligible to be co-enrolled into other studies.

Observational studies

Co-enrolment with REVIVED is allowed and encouraged (as long as the patient does not feel overburdened)

Interventional trials

Please contact the REVIVED Trial Team (revived@LSHTM.ac.uk) as these are considered on a case-by-case basis

If the intervention may affect our outcomes (e.g. mortality, hospitalisation due to heart failure), or is too burdensome for the patient, then they cannot be co-enrolled

Delegation Log

Next time a new staff member starts to work on REVIVED, please remember to use Version 3 (May 2014) of the Delegation Log.

You do not however need to transfer all current staff members on the previous version of the Delegation Log to the current version.

Getting to know you – Newcastle’s (Freeman) REVIVED Team

Freeman Hospital in Newcastle opened to recruitment in 2014 and have recruited 25 participants. They have been a big part of REVIVED’s recent success - 2019 was their best year so far with 9 participants recruited. We wanted to know a bit more about the team and how the trial works at their site.

The Team

PI: Dr Richard Edwards

Sub-Investigator: Dr Adam McDiarmid

Research Nurses: Vera Wealleans and Louise Quinn

Data Manager: Michael Arkley

How REVIVED works at Newcastle

The REVIVED Research Study Team is a multidisciplinary team (MDT), working together to try and contribute to the study as much as possible. We identify patients by screening the wards on a daily basis, reviewing cardiac MRI results and being available to clinicians that see heart failure in outpatients. We do this through reviewing patients’ electronic records and discussing cases in the multidisciplinary care team before we make any decision.

Patients identified as eligible by the consultants will be discussed at our MDT meeting. If the patient is a suitable candidate for the trial, then we approach them when they attend for their outpatient appointments or send out the study patient information sheet to them. In clinic, they are introduced to the study research nurses and are provided with a patient information sheet. We discuss the trial with the patient and any relatives present to make sure they have all the information they need and all the support they require to make an informed decision that is best for them. The trial recruitment is driven mainly by Dr Edwards and Dr McDiarmid.

Favourite film or TV series

The team as a whole like going to the cinema and their favourite films/TV Shows include: The Long Kiss Goodnight, The Bicycle Thieves, The Office UK, The Sopranos and Grease!
