

REVIVED

Recruitment News

March has been a fantastic month for REVIVED, the 300th patient was recruited on the 27th. 13 patients were recruited in total which makes this the best month so far in 2017.

Marion, Mark and the team at Golden Jubilee recruited three patients, which means they are now up to 35 patients in total. Sophie, Divaka and the team at St Thomas' also recruited three patients, one of which was the crucial 300th. The teams at Barts and King's both recruited two patients each, and the team at Worthing recruited one. Worthing's patient is their third in ten months which is a fantastic achievement for a smaller site.

Congratulations to Dr Paul Das, Lisa Evans, Emily Harman and the rest of the team at Glan Clwyd Hospital in North Wales on recruiting their first patient this month. North Wales is the 30th actively recruiting site in REVIVED, however we have plans to open more sites in 2017 (see below).

It is also fantastic to see that the new PI at Liverpool, Dr Pradeep Magapu, is having a positive effect on recruitment with their first patient since May 2015. Screening has now resumed and this expected to be the first of many patients in 2017 for them.

Congratulations and thanks to all the sites that have recruited this month, but thanks also to all sites that are actively screening and identifying patients. REVIVED recruitment keeps improving and it is that dedicated screening that keeps driving things forward.

Finally, a very Happy Easter from all of the REVIVED team at St Thomas' and the Clinical Trials Unit at London School of Hygiene and Tropical Medicine!

301 patients recruited

As REVIVED has passed the milestone of 300 patients this month, all sites that recruited in March will receive a small token of our appreciation. Thank you!

New sites

REVIVED is planning to open some new sites in 2017, Victoria Hospital in Blackpool, Derriford Hospital in Plymouth and Ninewells Hospital in Dundee have all confirmed interest and are currently reviewing trial documentation.

We will also be planning to relaunch the trial at open sites that are interested in participating but are not now actively screening and recruiting.

If your hospital are interested in being considered as a REVIVED site please get in touch via the contact details below. It is a great time to join or re-join REVIVED as the trial is going from strength to strength.
